

Global Fax Trends

Local and International regulations are making document delivery systems integral to companies business processes.

Fax is the preferred delivery mechanism for critical documents.

Companies serious about meeting governance standards for all critical documents, implement fax across the entire organization.

Companies serious about using best practice technology solutions use RightFax. After all, RightFax is the global fax server leader.

Profax (GreenFax) – Free Fax-to-Email

Profax fax-to-email is an exciting service that allows any individual or company with an email address to receive faxes FREE. You can receive as many faxes as you want, and it will not cost you a cent. The fax sender is charged a fee by Telkom for sending the fax.

In addition, users can send faxes directly from their email.

Why Choose Profax?

Profax is the SME and Consumer division of Vox Amvia, a Vox Telecom Company. As well as Profax is the only solution to be built on the RightFax software solution. With over 10 years in the fax market as distributors of the RightFax brand, Amvia customers include most of the top companies in SA. Vox Telecom is a leading alternative, independent telecom operator, providing voice and data services to the southern African market.

Why do I need a fax inbox?

- A fax inbox ensures that all faxes directed to individuals reach them securely and timeously
- No more wasted time looking for documents at a central fax machine
- No more lost faxes
- Private faxes are made available only to those people who have the rights to view them
- Saves time and money and improves productivity

How does it work

Customers are allocated a unique Profax 086 number supplied by Telkom. The Profax service automatically links this number to your email address, and any fax sent to your fax number is delivered to your email as an e-mail attachment.

In addition, customers have the option of sending faxes via their email to any fax number globally.

Can I send faxes?

Yes, fax sending is available on demand. Please see tables below:
